Application for Software Engineering Internship – 2026

Dear Hiring Manager,

I am excited to apply for the Software Engineering Internship at Pearson Lanka. As a third-year Information Technology undergraduate with a strong foundation in Java, object-oriented design, and software development, I am eager to contribute to Pearson's mission of shaping the future of learning.

Through my academic projects, I have gained experience across the full Software Development Lifecycle, including requirements analysis, software design, development, and testing. I have applied OOP concepts, design patterns, and Agile practices to develop scalable solutions and collaborate effectively with teams.

I am particularly drawn to Pearson's innovative approach to educational technology and the opportunity to work on large-scale software projects alongside experienced engineers. I am confident that my technical skills, enthusiasm to learn, and ability to work in collaborative environments make me a strong fit for this internship.

Thank you for considering my application. I look forward to contributing to Pearson's software initiatives and gaining hands-on experience in cutting-edge educational technologies.

Sincerely,

Shazmina Oudeen
